Measure. cobre; ten whereof are equal to three Paris ells. In Perſia, and ſome parts of the Indies, the gueze, whereof there are two kinds; the royal gueze, called alſo the *gueze monkeſſer*, containing two Paris feet ten inches eleven lines, or four-fifths of the Paris ell; and the ſhorter gueze, called ſimply *gueze*, only two thirds of the former. At Goa and Ormuz, the meaſure is the vara, the ſame with that of the Portugueſe, having been introduced by them. In Pegu, and ſome other parts of the Indies, the cando or candi, equal to the ell of Venice. At Goa, and other parts, they they uſe a larger cando, equal to ſeventeen Dutch ells; exceeding that of Babel and Balſora by $\frac{7}{8}$ *per centum*, and the vera by $6\frac{1}{4}$. In Siam, they uſe the ken, ſhort of three Paris feet by one inch. The ken contains two ſoks, the ſok two keubs, the keub twelve nious or inches, the niou to be equal to eight grains of rice, i. e. to about nine lines. At Camboia, they uſe the haſter; in Japan, the tatam; and the ſpan on ſome of the coaſts of Guinea. Measure.
