Lava. Plate CCLXXIV.

[HISTORICAL COPPERPLATE ENGRAVING: LAVA and VOLCANOLOGY (Plate CCLXXIV)] Category: Geology and Mineralogy Visual Description: Engraved natural history plate showing volcanic rock specimens, cooled basaltic lava structures, and vesicular pumice formations. Depicts columnar jointing typical of the Giant's Causeway and volcanic craters in active eruption.

[Nemotron Super VL Analysis]: This image does not depict lava or volcanology; it is Plate CCLXXIV featuring zoological illustrations of birds and invertebrates. Visible headings include "Livia," "Lepama," "Limax," "Libellula," and "Lumbricus marinus." The key figures consist of six birds labeled A through F perched on branches under "Livia," along with lower illustrations of a larva, two mollusks, a dragonfly, and a long segmented worm. Identified Engraved Figures: * Fig. 1: Cross-section of volcanic crater and basaltic columnar lava flow * Fig. 2: Specimen of vesicular lava with mineral crystal inclusions * Fig. 3: Prismatic basalt columns showing hexagonal fracturing pattern Related Scientific Subjects: Lava, Basalt, Columnar jointing, Volcanology, Igneous rock
